

Fire Extinguisher Servicing as of May 1st 2018 (Units brought to the workshop)

As of May 1st 2018 Fal Fire & Security have reviewed and updated our policy regarding the servicing of fire extinguishers in the workshop.

CO₂ and water fire extinguishers can no longer be brought into the workshop for servicing and must be serviced at the customer's site. This will be charged at £62 + VAT – this includes the cost of the call out and the servicing of the first two units, plus £6.40 + Vat for every additional unit serviced.

Units larger than 2Kg or 2L can no longer be brought into the workshop for servicing and must be serviced at the customer's site due to safety issues transporting them in vehicles. Charges as per above.

Smaller foam or dry powder units (1Kg, 2Kg, 1L and 2L) can be brought into the workshop for servicing at a cost of £12.50 + VAT per unit. The maximum number of units that can be brought to the workshop at any one time is 5. If you have more than 5 units you will need an engineer to come to the site to carry out the service at the cost stated above for fire extinguisher servicing call outs.

Fal Fire & Security will take no responsibility for any damage caused during transit of any units.

Fal Fire & Security will take no responsibility for correct placement of unit on site following the service.

These changes have been made to ensure compliance with current regulations, and safety of individuals transporting fire extinguishers.
